Partial boundary regularity for functionals with (p,q) -growth

Martedì 21 febbraio 2023, ore 16:45

Sala Riunioni, III piano, Plesso di Matematica e Informatica

Abstract: I will present recent results on partial boundary regularity for functionals with (p,q) -growth obtained with Chris Irving (Dortmund). The results rely on improved differentiability results which match those obtained in the case of p -growth.
